Summary

I'm a software developer with 1+ years' of experience specializing in frontend web development.

I design and build highly responsive web pages and applications.
I'm a creative person and that plays a good role in my work.

So far, I have HTML, CSS, JavaScript, Bootstrap, JQuery, React, MySql, PHP, and Git/GitHub in my skill set.

I'm still enthusiastically learning other frameworks and programming languages on the go.

I have led a team of developers during my internships with different companies in delivering tasks efficiently.

I'm always open to learning and improving my skills.

Experience

React Developer
Side Hustle
Apr 2022 - Jul 2022 (4 months)
As a react developer intern at Side hustle, I learned and applied ReactJS in building responsive web pages and applications.
I led a team of five interns in carrying out tasks effectively and delivering within the time given.
It was a nice experience.

Full-stack Developer
Anhydraze
Feb 2022 - Jul 2022 (6 months)
During this period of training, I learned the basics of frontend and backend development using ReactJS and Laravel in the respective tracks.
I contributed to building the company's official website as a backend developer.

Student Intern
Oluaka Institute of Technology
Sep 2021 - Jan 2022 (5 months)
I learned the basics of frontend web development and how to use the version control system, GitHub.
